

## Finger Lakes Grape Program

The Finger Lakes Grape Program provides timely, research-based information on grape growing and related topics. The *Finger Lakes Vineyard Notes* newsletter and weekly 'Vineyard Update' e-mails are part of the educational program provided by the program and are included in the enrollment package. The *Vineyard Notes* newsletter will be sent electronically. Paper copies are available for an additional \$10/year fee to cover printing and mailing costs. Subscribers receive a copy of the *New York and Pennsylvania Pest Management Guidelines for Grapes*, as well as meeting notices and emergency mailings. Pesticide credits are given for many educational programs. Additional copies of the *New York and Pennsylvania Pest Management Guidelines for Grapes* may be purchased for \$21. This is an annual enrollment that runs from January through December.
